SHIFT SCHEDULING APP

01

SHIFT SCHEDULE ACCESSIBLE AT ALL TIMES

The ZScheduling app is designed to simplify the everyday tasks of shift planners and workers. The shift schedule is in fact always accessible and updatable in real time from a mobile phone, which is a fundamental advantage for shift workers who don't have a PC.

02

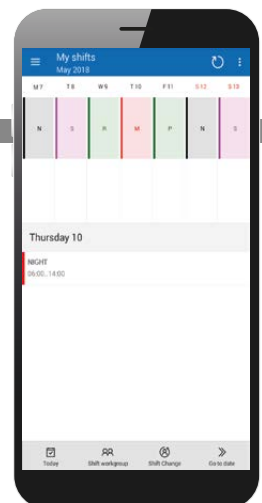

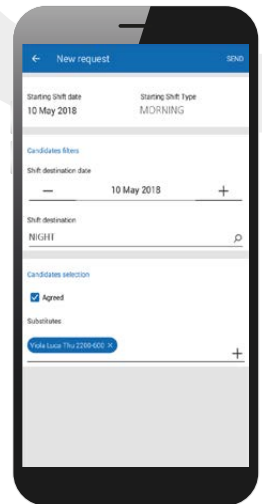

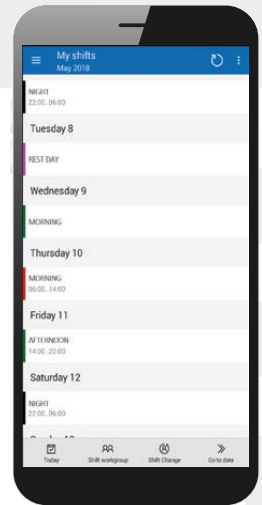

EVERYTHING IS UNDER CONTROL FOR THE PLANNING MANAGER

Personnel in charge of planning shifts for their work group can do so simply and effectively, thanks to the publication of the schedule, which is visible to all. Any exception can also be managed promptly thanks to the receipt of notifications of shift change requests, unexpected events, sudden absences and accepted replacements.

03

SHIFTS ALWAYS AT HAND FOR WORKERS

Shift workers can have a complete overview of the situation: they can see their shifts with a daily or weekly view, see which colleagues are working on the same shift and their contact details, they can request, accept or refuse a shift change. With the Activity Plan function, they can also see the planned activities and the necessary movements.
